Index

Preface

Diabetes mellitus (DM), commonly known as diabetes, is a group of metabolic disorders characterized by a high blood sugar level over a prolonged period of time.

https://en.wikipedia.org/wiki/Diabetes

Type 2 diabetes is due to insufficient insulin production from beta cells in the setting of insulin resistance. Insulin resistance, which is the inability of cells to respond adequately to normal levels of insulin, occurs primarily within the muscles, liver, and fat tissue. In the liver, insulin normally suppresses glucose release. However, in the setting of insulin resistance, the liver (♃) inappropriately releases glucose into the blood (♂) .

Diabetes damages arteries and makes them targets for hardening, called atherosclerosis. That can cause high blood pressure(♂/⚷), which if not treated, can lead to trouble including blood vessel damage, heart disease (♂/⚷ =☉) , strokes(☉/☿ =♂/♇), diabetic retinopathy which can result in blindness(☉/☽), and kidney (☿) failure.

Blood : ♂

High blood pressure : ♂/⚷

Heart disease : ♂/⚷ =☉

Liver : ♃

The main planets are ☉,♂,♃ and ⚷ .

Used :

1-Sidereal zodiac (Krishnamurti Ayanamsa), Mean Node.
23°45′56" for Year 2000. Speed of precession is 50.2388475.

2-Progressions Keys :
   Secondary Progression : 1 sidereal day = 1 sidereal year

3- Harmonic 16 and 256
4- Astrology Software
   a-Zet Astrology Software
   b-Nova Chartwheels[1] (alabe.com)

Zet Settings :
a sidereal day (23h 56m 4.091s)
a sidereal month (27d 7h 43m 11.47s)
a sidereal year (365d 6h 9m 9.5s)
